Our Approach

To achieve our objectives we work in project perspective with an approach based on PMBOK-PMI standard for effective, efficient management and maximum control of our customer's projects:

- ✓ Consultation and diagnosis for the detection of needs of your organization.
- ✓ Formulation of suggestions and solutions to your organization and your resources.
- ✓ Definition of the project by the consultant after you have made your choice on one of the proposed solutions. Generation of project charter.
- ✓ Planning Scope, Time, Budget, Quality, HR, Communication Risks, Procurement and stakeholders.
- ✓ Implementation of the project following the steps of the schedule management plan.
- ✓ Monitoring and controlling to ensure the effectiveness of the work of the consultant. Tracking issues and changes. Update documents and manage conflicts.
- ✓ Closing the Project and operation of the service with the client.
- ✓ Transfer service or final operations to your internal operating department.

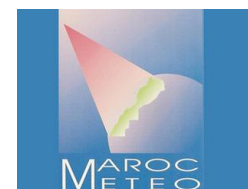

These are processes are applied to every phase of your projects.
